PROFESSIONAL SUMMARY

Product Engineer with 2 years 6 months of experience in Flutter development, backend engineering, system design, and scalable product development. Experienced in food delivery, ERP, e-commerce, and healthcare products. Currently involved in product flow planning, architecture design, code reviews, backend development, hosting, deployment, and managing an 8-member team.

TECHNICAL SKILLS

Mobile: Flutter, Dart, Provider, BLoC, GetX, Riverpod

Backend: Node.js, Express.js, NestJS, REST APIs, WebSockets

Frontend: React.js, TypeScript, Next.js

Databases: PostgreSQL, MongoDB, Redis, Supabase, Firebase

DevOps: Docker, AWS, Render, Railway, Hostinger, GitHub

Architecture: Monolithic Architecture, Clean Architecture, Microservices Design Concepts

PROFESSIONAL EXPERIENCE

Product Engineer — Zeedz Innovations

February 2026 – Present | Full-time | Hybrid

- Develop and review Flutter and backend code.
- Plan product flows and design architecture for food delivery, ERP, e-commerce, and website products.
- Manage an 8-member team, allocate tasks, mentor developers, and support issue resolution.
- Contribute to code reviews, performance improvements, hosting, deployment, and production troubleshooting.
- Helped deliver a food delivery ecosystem containing client, shop, delivery partner, and admin applications within three months.

Flutter Developer — Srijana Healthcare Solutions

February 2025 – February 2026 | Full-time

- Developed new features and fixed application issues.
- Worked on client-side and doctor-side doctor booking applications.
- Supported Play Store and App Store hosting and release processes.
- Used Flutter, Provider, APIs, and testing practices.

Flutter Developer Intern — Clovion Tech

June 2024 – November 2024 | Full-time Internship

- Developed features and fixed issues in a matrimony application.
- Worked on the client-side app using Flutter, Provider, APIs, and testing practices.

SELECTED PROJECTS

Food Delivery Platform — Product Engineer | 3 months

- Contributed to system design, backend architecture, and technical team leadership.
- Worked with Flutter, React.js, Express.js, PostgreSQL, Redis, BullMQ, Firebase, push notifications, and Supabase.
- Contributed to customer, shop, delivery partner, and admin workflows.
- Worked on a smart dispatch approach intended to reduce delivery-partner waiting time after order acceptance.

ERP Products

Contributed to product development, feature implementation, product flows, backend work, architecture discussions, and deployment activities.

Doctor Booking Application

Worked on client-side and doctor-side applications, including feature development, issue fixing, API integration, testing, and store deployment support.

LEADERSHIP & COLLABORATION

- Managed and guided an 8-member team for approximately six months.
- Allocated project tasks and supported technical execution across product modules.
- Participated in architecture decisions, code reviews, issue fixing, mentoring, and client communication.

EDUCATION

Bachelor of Engineering — Artificial Intelligence & Data Science

Noorul Islam Centre for Higher Education, Kumarakoil, Thuckalay, Kanniyakumari, Tamil Nadu

2020 – 2024

CORE STRENGTHS

Product flow planning • Cross-functional development • Backend integration • System design • Technical problem solving • Team coordination • Hosting and deployment
